METHOD

Method and Sources

Where and how the data were obtained.

Sources

Student and staff data come from the Giresun University Statistics and Data Portal (sayilarla.giresun.edu.tr); graduate data come from the Graduate Information System (mezun.giresun.edu.tr).

Date

All data were retrieved on October 27, 2026. Portal values are snapshots and change as records are updated.

Scope

Active students cover all undergraduate programmes of the Faculty, including the English-medium and evening programmes. Academic staff covers professors, associate professors, assistant professors and research assistants of the Faculty, together with one lecturer working at the Faculty on assignment. Students per faculty member = active students / (professors + associate professors + assistant professors).

Graduates

Graduates are counted by year of graduation and include evening programmes. 2026 shows graduations recorded up to the report date.

Limitation

The portals publish faculty-level student and staff numbers only as current values. The five-year trend is therefore given for graduates only; no yearly series is presented for students or staff.
